## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30, 31 and 35-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The reasons for this rejection are as set forth in paragraph 8 of the last Office action. In response to this rejection, applicant argues in paper no. 42 that "[t]he claim need not include the vessel as a structural limitation for one skilled in the art to understand what is encompassed by the detector as claimed." Applicant then gives in the above noted paper an analogy to elucidate the reasons for traverse. The arguments are not persuasive.

Regarding applicant's hypothetical analogy, it is agreed that the term "light source" would not be indefinite. However, the term "platform adapted to receive a microscope slide" would. In the instant claims, a number of elements are defined with respect to some non-existing reaction vessel. Absolutely no structure can be attributed to such a vessel, and hence no clear definition can be ascertained by reference to it. Conversely, where the vessel is positively recited as an element of the claim, as in instant claim 39, then the specification can be drawn upon as providing definition to the recited vessel. Instant claim 30, by its recitation of a thermal cyclor "adapted to receive, at least on reaction vessel" and a detector operable to detect a fluorescence optical signal "without opening the at least one reaction vessel", is indefinite because the noted

language defines structural language upon a term which cannot itself be ascribed any structural definition.

3. Claims 39, 40 and 44-47 are allowed.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
